Jasmine Sullivan

Austintown, OH | jasminealexussullivan@gmail.com | LinkedIn | Portfolio

Technical Support II & Cybersecurity Professional with experience supporting enterprise SaaS and healthcare IT environments, including EHR/EMR systems. Proven background in Tier 2 technical support, incident management, system escalations, access and authentication troubleshooting, and technical documentation. Skilled in Active Directory, Microsoft 365, MFA, VPN, ServiceNow, Datadog log analysis, and Python, with hands-on cybersecurity experience in threat intelligence, OSINT, IOCs, TTPs, SIEM analysis, and security operations. Backed by training and certifications across cybersecurity, DevOps, project management, and IT, with a strong focus on secure systems, risk reduction, and operational efficiency.

RELEVANT SKILLS & EXPERTISE

Tools/Languages: Linux, Windows, SQL(BigQuery), Splunk, Wireshark, tcpdump, Suricata, Python
Security Practices: Information Security, Network Security, Vulnerability Assessment, Threat Analysis, Log Analysis, Security Frameworks and Controls
Technical Support: SaaS Support, VPN & MFA Troubleshooting, Authentication Support, Ticketing Systems (ServiceNow, Jira, Freshdesk), Ticket Management, Knowledge Base Management, Escalation Management, Root Cause Analysis **Software Platforms:** Google Workspace, Slack, Microsoft 365, Microsoft Teams, Outlook, Zendesk, Datadog, Confluence, Active Directory, Okta, Epic EMR
Strengths: Problem-Solving, Collaboration, Attention to Detail, Calmness Under Pressure, Technical Troubleshooting, Workflow Optimization, Cross-Functional Collaboration, Incident Management

EDUCATION, CERTIFICATES, & CERTIFICATIONS

Associate of Applied Business (AAB), Information Technology – Cybersecurity • Cuyahoga Community College | Cleveland, OH 3.5 GPA, Phi Theta Kappa Honor Society **Expected May 2027**

Merit America Cybersecurity Apprenticeship • Remote **May 2026 – August 2026**
(Completed the Google Cybersecurity Professional Certificate

Cultivated holistic understanding of cybersecurity's critical role in organizational security, privacy, and success, including how to systematically identify and mitigate risks, threats, and vulnerabilities Gained practical experience with **Linux, SQL**, **Python** and utilized **SIEM tools**, **IDS**, and **network protocol analyzers** for proactive threat management Applied knowledge to real-world scenarios, developing skills in proactive **threat detection** and **response** through completion of dynamic hands-on projects, including conducting a simulated **security audit**, responding to a **cyber incident**, analyzing **vulnerable systems**, and completing an **incident handler's journal**

Google IT Support Certificate (03/2025)
Google Cybersecurity Certificate (06/2026)
Google IT Automation with Python (06/2026)
Google Project Management (06/2026)
DevOps Foundation Certificate — Global Lynx USA (05/2026)
AI Cyber Defense Ops — Just Hacking Training (06/2026)
Script-Based Malware Analysis — Just Hacking Training (09/2026)

RECOGNITION & AWARDS

Winning Attitude Award — Q3 2025 | Winning Attitude Award — Q4 2024 | Aya Spirit Award — Q1 2024

- Promoted internally from **Customer Support Representative** to **Technical Support II** based on technical performance, operational contributions, and team impact
- Recognized for workflow optimization, cross-functional collaboration, and proactive support process improvements

PROFESSIONAL EXPERIENCE

Cyber Threat Intelligence Intern • Cyber Security Forum Initiative (CSFI) | Remote **08/2026 – Present**

- Conduct threat intelligence research on threat actors, infrastructure, tactics, techniques, and procedures (TTPs) to support intelligence assessments and reporting.
- Analyze open-source intelligence (OSINT) from cybersecurity sources to identify indicators of compromise (IOCs), attack patterns, threat activity, and adversary behavior.
- Support Requests for Information (RFIs) by researching threat actor activity, documenting findings, and contributing to intelligence products for team review.
- Correlate threat actor infrastructure, IOCs, and TTPs to strengthen intelligence findings and support threat intelligence analysis.

Technical Support Representative II • Aya Healthcare | Remote **06/2024 – Present**

- Managed 40+ technical incidents daily through chat, email, and ticketing platforms while maintaining 90%+ SLA adherence in a high-volume healthcare SaaS environment.
- Troubleshot MFA, VPN, authentication, login, and application-related issues across multiple systems to support secure access and operational continuity.
- Resolved 87%+ of Tier 1 support issues independently while maintaining high service quality and efficient issue resolution across enterprise healthcare systems.
- Maintained 96%+ CRM and ticket logging accuracy while documenting technical escalations, troubleshooting workflows, and operational findings across ServiceNow and Freshdesk.
- Investigated recurring technical issues, identified root causes, and supported targeted system improvements, workflow optimization, and operational efficiency.
- Trained and mentored 3 newly hired support analysts, improving onboarding efficiency and supporting team-wide operational readiness.
- Identified recurring ticket trends and case drivers, contributing workflow improvement recommendations that improved support efficiency, routing accuracy, and escalation handling.
- Supported user access and application workflows across healthcare systems, including Active Directory and Microsoft 365, troubleshooting authentication, permissions, and account access issues.

Customer Support Representative • Aya Healthcare | Remote **06/2023 – 06/2024**

- Provided high-volume customer support across phone, chat, and email, handling 50+ interactions daily across diverse service lines.
- Resolved customer concerns efficiently while exceeding service quality and performance benchmarks, consistently ranking in the top 15% of team performance.
- Documented technical incidents, collaborated with internal teams on escalations, and contributed to workflow improvements that enhanced operational support processes.

Career Mail Processing Clerk • USPS | Youngstown, OH **01/2019 – 06/2023**

- Processed and sorted high volumes of mail and packages while maintaining accuracy and meeting daily production deadlines.
- Operated mail-processing equipment and followed routing, handling, and distribution procedures.
- Identified and corrected processing issues to reduce delays and support efficient workflow.
- Maintained compliance with safety, security, and confidentiality procedures in a fast-paced environment.
- Worked independently and with team members to meet operational goals and daily processing targets.

Customer Support Generalist • Amazon | Remote **10/2018 – 11/2020**

- Supported customers across phone, chat, and email channels, handling a high volume of inquiries daily while maintaining consistent service quality across all three formats.
- Consistently met or exceeded performance benchmarks for response time, resolution accuracy, and customer satisfaction.

Front Desk Receptionist • Humility House | Austintown, OH **05/2017 – 10/2018**

- Maintained strict HIPAA compliance while managing sensitive patient data, privacy protocols, and access control across daily operations.
- Assisted staff with scheduling system navigation, password and login issues, and basic EMR troubleshooting while maintaining accurate patient records and supporting audit readiness.
- Coordinated scheduling and administrative workflows, improving efficiency of daily operations in a fast-paced healthcare environment.

TECHNICAL PROJECTS

Automated Event & Alerting Pipeline | Python, GitHub Actions, Webhooks, REST APIs

- **Developed an automated Python application** to query external APIs, parse structured JSON responses, and filter incoming data based on custom rules.
- **Built a local JSON state tracking system** to log processed entry IDs, preventing duplicate notifications and optimizing webhook efficiency.
- **Configured automated workflows using GitHub** Actions to run scheduled cron triggers, enabling hands-off continuous monitoring.
- **Integrated Discord webhooks** to format and deliver real-time, actionable alerts directly to target communication channels.

Applied Security Analysis & Log Management | Splunk, Wireshark, Linux, Windows

- **Analyzed PCAP network traffic** using Wireshark and tcpdump to inspect ARP, TCP, DNS, and HTTP/HTTPS protocol flows for network troubleshooting.
- **Conducted SIEM log analysis** and incident investigations using Splunk (Boss of the SOC) to identify attack vectors and system anomalies.
