Jasmine Sullivan

Austintown, OH | jasminealexussullivan@gmail.com | LinkedIn | Portfolio

Analytical IT professional with experience supporting enterprise technology, SaaS platforms, and healthcare information systems, with a proven record of resolving complex issues, identifying operational gaps, and improving the reliability of business-critical services. Brings a detail-oriented, investigative approach to evaluating problems, documenting findings, and recognizing risks that others may overlook. Recognized for consistent performance, sound judgment, and contributions to operational improvements in demanding environments. Combines established technical experience with a growing cybersecurity background to support secure, accurate, and dependable operations.

RELEVANT SKILLS & EXPERTISE

Tools/Languages: Linux, Windows, SQL(BigQuery), Splunk, Wireshark, tcpdump, Suricata, Python
Security Practices: Information Security, Network Security, Vulnerability Assessment, Threat Analysis, Log Analysis, Security Frameworks and Controls, Identity & Access Management (IAM), HIPAA Compliance, Data Privacy
Technical Support: SaaS Support, VPN & MFA Troubleshooting, Authentication Support, Ticketing Systems (ServiceNow, Jira, Freshdesk), Ticket Management, Knowledge Base Management, Escalation Management, Root Cause Analysis, Application Support & Troubleshooting, Incident Triage, Technical Documentation
Software Platforms: Google Workspace, Slack, Microsoft 365, Microsoft Teams, Outlook, Zendesk, Datadog, Confluence, Active Directory, Okta, Epic EMR
Strengths: Problem-Solving, Collaboration, Attention to Detail, Calmness Under Pressure, Technical Troubleshooting, Workflow Optimization, Cross-Functional Collaboration, Incident Management

EDUCATION, CERTIFICATES, & CERTIFICATIONS

Associate of Applied Business (AAB), Information Technology – Cybersecurity • **Expected May 2027**
Cuyahoga Community College | Cleveland, OH

Merit America Cybersecurity Apprenticeship • Remote **May 2026 – August 2026**

Cultivated a holistic understanding of cybersecurity's critical role in organizational **security, privacy, and risk management,** including how to systematically identify and mitigate **risks, threats, and vulnerabilities**. Gained practical experience with **Linux, SQL, Python, SIEM tools, IDS, and network protocol analyzers** for proactive threat management. Applied knowledge through **hands-on cybersecurity projects**, including conducting a **simulated security audit**, responding to a **cyber incident**, analyzing **vulnerable systems**, and completing an **incident handler's journal**

Google IT Support Certificate (03/2025)
Google IT Automation with Python (06/2026)
Google Cybersecurity (06/2026)
Google Project Management (06/2026)
DevOps Foundation Certificate — Global Lynx USA (05/2026)
AI Cyber Defense Ops — Just Hacking Training (06/2026)
Script-Based Malware Analysis — Just Hacking Training (09/2026)

RECOGNITION & AWARDS

Winning Attitude Award — Q3 2025 | Winning Attitude Award — Q4 2024 | Aya Spirit Award — Q1 2024

- Promoted internally from **Customer Support Representative** to **Technical Support Reprensentative II** based on technical performance, operational contributions, and team impact
- Recognized for workflow optimization, cross-functional collaboration, and proactive support process improvements

Phi Theta Kappa Honor Society | Inducted February 2026

- Recognized for outstanding academic achievement and selected for membership in a prestigious international honor society that recognizes exceptional academic performance and excellence.

Dean's List — Fall 2025 & Summer 2026 | Cuyahoga Community College

PROFESSIONAL EXPERIENCE

Cyber Threat Intelligence Intern • Cyber Security Forum Initiative (CSFI) | Remote **08/2026 – Present**

- Conduct threat intelligence research on threat actors, infrastructure, tactics, techniques, and procedures (TTPs) to support intelligence assessments and reporting.
- Analyze open-source intelligence (OSINT) from cybersecurity sources to identify indicators of compromise (IOCs), attack patterns, threat activity, and adversary behavior.
- Support Requests for Information (RFIs) by researching threat actor activity, documenting findings, and contributing to intelligence products for team review.
- Correlate threat actor infrastructure, IOCs, and TTPs to strengthen intelligence findings and support threat intelligence analysis.

Technical Support Representative II • Aya Healthcare | Remote **06/2024 – Present**

- Managed 40+ technical incidents daily through chat, email, and ticketing platforms while maintaining 90%+ SLA adherence in a high-volume healthcare SaaS environment.
- Troubleshot MFA, VPN, authentication, login, and application-related issues across multiple systems to support secure access and operational continuity.
- Resolved 87%+ of Tier 1 support issues independently while maintaining high service quality and efficient issue resolution across enterprise healthcare systems.
- Maintained 96%+ CRM and ticket logging accuracy while documenting technical escalations, troubleshooting workflows, and operational findings across ServiceNow and Freshdesk.
- Investigated recurring application and system issues using log analysis and root cause analysis (RCA), documented findings, and collaborated with internal teams to resolve escalations and improve operational efficiency.
- Trained and mentored 3 newly hired support analysts, improving onboarding efficiency and supporting team-wide operational readiness.
- Identified recurring ticket trends and case drivers, contributing workflow improvement recommendations that improved support efficiency, routing accuracy, and escalation handling.
- Supported user access and application workflows across healthcare systems, including Active Directory and Microsoft 365, troubleshooting authentication, permissions, and account access issues.

Customer Support Representative • Aya Healthcare | Remote **06/2023 – 06/2024**

- Provided high-volume customer support across phone, chat, and email, handling 50+ interactions daily across diverse service lines.
- Resolved customer concerns efficiently while exceeding service quality and performance benchmarks, consistently ranking in the top 15% of team performance.
- Documented technical incidents, collaborated with internal teams on escalations, and contributed to workflow improvements that enhanced operational support processes.

Mail Processing Clerk (PSE & Career) • USPS | Youngstown, OH **01/2019 – 06/2023**

- Processed and sorted high volumes of mail and packages while maintaining accuracy and meeting daily production deadlines.
- Operated mail-processing equipment and followed routing, handling, and distribution procedures.
- Identified and corrected processing issues to reduce delays and support efficient workflow.
- Maintained compliance with safety, security, and confidentiality procedures in a fast-paced environment.
- Worked independently and with team members to meet operational goals and daily processing targets.

Customer Support Generalist • Amazon | Remote **10/2018 – 11/2020**

- Supported customers across phone, chat, and email channels, handling a high volume of inquiries daily while maintaining consistent service quality across all three formats.
- Consistently met or exceeded performance benchmarks for response time, resolution accuracy, and customer satisfaction.

Front Desk Receptionist • Humility House | Austintown, OH **05/2017 – 10/2018**

- Maintained strict HIPAA compliance while managing sensitive patient data, privacy protocols, and access control across daily operations.
- Assisted staff with scheduling system navigation, password and login issues, and basic EMR troubleshooting while maintaining accurate patient records and supporting audit readiness.
- Coordinated scheduling and administrative workflows, improving efficiency of daily operations in a fast-paced healthcare environment.

TECHNICAL PROJECTS

Automated Event & Alerting Pipeline | Python, GitHub Actions, Webhooks, REST APIs

- **Developed an automated Python application** to query external APIs, parse structured JSON responses, and filter incoming data based on custom rules.
- **Built a local JSON state tracking system** to log processed entry IDs, preventing duplicate notifications and optimizing webhook efficiency.
- **Configured automated workflows using GitHub** Actions to run scheduled cron triggers, enabling hands-off continuous monitoring.
- **Integrated Discord webhooks** to format and deliver real-time, actionable alerts directly to target communication channels.

Applied Security Analysis & Log Management | Splunk, Wireshark, Linux, Windows

- **Analyzed PCAP network traffic** using Wireshark and tcpdump to inspect ARP, TCP, DNS, and HTTP/HTTPS protocol flows for network troubleshooting.
- **Conducted SIEM log analysis** and incident investigations using Splunk (Boss of the SOC) to identify attack vectors and system anomalies.

TryHackMe | Cybersecurity Hands-On Labs

- **Security Monitoring & Incident Analysis:** Completed hands-on labs involving Splunk, log analysis, incident investigation, and identification of suspicious activity.
- **Network Traffic Analysis:** Analyzed network protocols and packet captures using Wireshark to investigate traffic patterns and support network troubleshooting.
- **Linux & Windows Security:** Practiced command-line operations, file permissions, system administration fundamentals, and Windows security configurations.
- **Digital Forensics:** Explored Windows artifacts, registry analysis, file systems, and investigative techniques through simulated security scenarios.
